Secure and Simplify Credential Management

Safeguarding user logins and passwords is a critical aspect for businesses, as it addresses challenges associated with security risks and data protection. Organizations prioritize countering these risks through encryption, access controls, and authentication mechanisms. **WALLIX Enterprise Vault** centralizes business passwords and sensitive identity data. This solution strengthens security through encrypted storage, reinforcing credential protection and optimizing the user experience.

By fortifying a secure data environment, **WALLIX Enterprise Vault** enhances collaboration within teams while safeguarding against potential threats. In essence, the platform serves as a comprehensive solution to the multifaceted challenges of credential management.

Features & Capabilities

End-User

How it Works?

About WALLIX

WALLIX protects identities and access to IT infrastructure, applications, and data. Specializing in Privileged Access Management, WALLIX solutions ensure compliance with the latest IT security standards and protect against cyber-attacks, theft and data leaks linked to stolen credentials and elevated privileges.

Benefits

Improve your Security

A secure repository for credentials and more, reducing the risk of password reuse across your teams, and enhancing overall security.

Privacy by Design

Privacy is integrated into the design, with data fully encrypted on your device for exclusive access.

Enhanced productivity, and elevated user experience

Reduce the workload for administrators and teams while ensuring a user-friendly experience for storing and sharing credentials.

Compliance

Enterprise Vault aligns with the best practices to help achieve security compliance.
